PROFESSIONAL SUMMARY

Versatile Computer Science undergraduate specializing in AI & ML with hands-on experience in software development, machine learning engineering, data analysis, and business intelligence. Proficient in Python, Java, TensorFlow, PyTorch, SQL, and Power BI. Led development of a real-time multi-modal AI system and deployed CNN-based production applications. Experienced in translating business requirements into technical solutions, and delivering measurable results. Seeking opportunities in AI/ML Engineering, Software Development, Data Analysis, or Business Analysis roles.

SKILLS

Programming & Development: Python, Java, C, SQL (MySQL, SQLite), OOP, System Design, REST APIs, Git, GitHub

AI/ML & Deep Learning: TensorFlow, PyTorch, Keras, Scikit-learn, CNN, Transfer Learning, OpenCV, NLP

Data Analysis & BI: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Streamlit

Database & Modeling: MySQL, ERD Design, Relational Schema, Data Modeling

Business & Documentation: Requirements Gathering, Process Mapping, Technical Writing

Tools & Platforms: Jupyter Notebook, VS Code

PROJECTS

SentimentX – Multimodal AI Emotion Recognition System | Lead Developer

Python, PyTorch, TensorFlow, OpenCV, NLP, CK+ Dataset

- Architected production-grade multi-modal AI system processing video, audio, and text inputs for real-time emotion detection (6+ classes), age estimation, and gender prediction with <100ms inference latency.
- Designed feature fusion architecture combining CNN visual features, audio signal processing, and NLP embedding achieving 85%+ accuracy on CK+ benchmark dataset.
- Led complete AI development life-cycle: data preprocessing, model training, evaluation, and real-time deployment.

Real-Time Disaster Management System | Project Lead & Architect

Python, Pandas, Power BI, Streamlit | Team of 6

- Led 6-member team to build disaster intelligence platform for live event analysis.
- Built ETL pipelines reducing data inconsistencies and developed Power BI dashboards enabling faster decision-making for aid coordination and volunteer routing.

Plant Disease Detection AI System | Edunet Foundation (AICTE Internship)

Python, TensorFlow, CNN, Transfer Learning, Streamlit

- Built end-to-end ML pipeline: 20,000+ image dataset curation, preprocessing, CNN design, transfer learning with VGG16/ResNet50, achieving 92% classification accuracy across 38 disease classes.
- Deployed production Streamlit web app enabling real-time AI inference for agricultural users.

AgroSage AI — Crop Advisory & Market Intelligence Platform | Live: <https://agrosage-ai-1045649332725.us-central1.run.app> | GitHub: <https://github.com/Dayanand-MK/AgroSage-AI>

Python, FastAPI, React, Vite, Tailwind CSS, Random Forest, Scikit-learn, Docker, Google Cloud Run

- Built a full-stack ML web app (FastAPI + React) with a Random Forest classifier recommending optimal crops across 22 types using soil and climate inputs, with Explainable AI breakdowns.
- Integrated live Mandi commodity prices (data.gov.in), Open-Meteo weather API, and a financial analysis module estimating yield, revenue, and profit per acre
- Containerized with Docker and deployed on Google Cloud Run.

EXPERIENCE

Python & AI/ML Development Intern

Jul 2024 – Sep 2024

Main Flow Services and Technologies | Noida, UP (Remote)

- Completed 10+ weekly assignments in data analysis, ML, and software development using Python, Pandas, NumPy, TensorFlow, and PyTorch.
- Developed automation scripts and ML experiments solving real-world challenges, published to GitHub with comprehensive documentation.

AI/ML Engineer Intern

Feb 2025 – Apr 2025

Edunet Foundation | Bengaluru, Karnataka (Remote)

- Independently designed and deployed full-stack CNN application from requirements to production within 3-month AICTE program.
- Executed complete ML pipeline: data preprocessing, architecture design, training, evaluation, and Streamlit deployment achieving 92% accuracy.

Software & Systems Engineering Intern

Jun 2025 – Jul 2025

TVM Signalling and Transportation Systems Pvt. Ltd. | Chennai (On-site)

- Contributed to development and testing of railway signalling software in safety-critical environment.
- Applied computer vision to real-time system interfaces, supported UI enhancements and workflow optimization.

EDUCATION

Bachelor of Engineering – Computer Science (AI & ML Specialization)

Expected 2027

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College, Avadi, Chennai

Relevant Coursework: AI, Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures, DBMS, Software Engineering, OOP

Higher Secondary Certificate (HSC)

2021 – 2023

Kamlavati Senior Secondary School, Sahapuram

CERTIFICATIONS & LEADERSHIP

- AICTE Internship – AI for Sustainable Agriculture, Edunet Foundation (2025): End-to-end ML project delivery
- Wells Fargo Software Engineering Virtual Experience – Forage (Dec 2024): Database design, ERD modeling, financial systems
- Tata Cybersecurity Analyst Virtual Experience – Forage (Feb 2025): IAM strategy, security documentation
- Led 6-member cross-functional team for disaster management system with on-time delivery of all milestones
- Maintained active GitHub portfolio with 6+ repositories showcasing ML, data analysis, and software development projects
